PROJECTS

1. Food Delivery Website | HTML, CSS, JavaScript, JSP, MVC, SQL, MYSQL

We have developed an online food ordering platform that facilitates menu browsing, order placement, and delivery or pickup from various restaurants. The platform is designed to enhance dining experiences by providing convenience, variety, and efficiency. As a Backend Developer, I managed all CRUD operations, user and order data integration, and system troubleshooting.

Technologies Include:

HTML, CSS, JavaScript, JSP, Servlets , MVC Architecture, Mysql, & Apache Tomcat.

Key Contributions:

-Crafted an attractive and adaptable user interface using HTML/CSS.

-Implemented modular interactions utilizing JSP.

-Ensured effective server-side development through MVC architecture.

-Utilized MYSQL for efficient data management.
